- Carronite shell

What is Carronite? Carronite baths are twice as strong as standard acrylic baths.

They ensure water stays warmer for longer than in a cast iron or steel enameled bath.

They have a unique cradle system; this has been designed to cope with the additional weight of the Carronite material.

Once installed, the baths stability and rigidity prevent movement, thus offering the perfect solution to the problem of sealing.

They are 25% more slip resistant than a cast iron or steel enameled bath.

To upgrade your bath select your upgrade from the Additional Options boxes below, your basket total will be automatically updated.

Other Optional Upgrades

If you would like a different whirlpool system please contact us for a quote, all our whirlpool baths are manufactured by us at our UK factory.
