
DESCRIPTION

Carron Premier Centennial Corner Whirlpool Bath

The Carron Centennial is a very large corner bath that will be the envy of your friends and family. Indulge in a very special bathing experience with this large 1500 x 1500 corner bath, fitted with our Premier whirlpool spa system

All our Carron Premier baths are finished in Carronite as standard which is an advanced reinforcement layer applied to the underside of the bath, patented by Carron Bathrooms. Baseboards are 18 mm and fully encapsulated given them the strength of cast iron whilst enjoying all the benefits of a modern acrylic baths.

Size

- 1500 x 1500 x 495 mm - 407 Litres

Whirlpool System Specification

- Carronite Shell
- 14 Flush Jet Whirlpool System
- 10 Jet Air Spa System with Lateral Discharge Jets
- Multi Mood Lighting
- LED 5 Function Electronic Touch Pad
- 1.5 KW Inline Heater
- 1.0 HP Pump
- Heated Air Spa Blower
- Ozonator
- Divertor Valve

The LED touch pad allows you to effortlessly control your new whirlpool bath, with on/off functions for the whirlpool, spa and mood lighting system, a temperature display finishes the look. On the underside features include a water level sensor which stops the system from running when not enough water has been added, a hygiene purge once the bath is drained dries the pipe work. If you like a long soak the heater keeps the water at a constant temperature once filled. The ozonator is a very effective sanitizer and can reduce the use of harsh chemicals significantly. Ozone makes the water look clearer and destroys oils and thereby eliminates the greasy edge often left at water level. The divertor valve allows you to send air from the air spa into the whirlpool jets giving an extremely strong massage.

More about Carronite

What is Carronite? Carronite baths are twice as strong as standard acrylic baths.

They ensure water stays warmer for longer than in a cast iron or steel enameled bath.

They have a unique cradle system; this has been designed

to cope with the additional weight of the Carronite material. Once installed, the baths stability and rigidity prevent movement, thus offering the perfect solution to the problem of sealing.

They are 25% more slip resistant than a cast iron or steel enameled bath.
