

Fiddlers Elbow Grease

CBD & CBG Vape Eliquid - 220mg

We boosted our regular CBD liquid with Cannabigerol (CBG). This is another naturally occurring cannabinoid from the plant that enhances the effects of the CBD.

Available in 5 terpene profiles (see Compare):
Select the profile from the drop down list below and add to basket.

Why not try all 5 with our special trial pack? - [click here](#)

MCT is incredibly versatile diluent - 100% natural MCT (medium-chain triglyceride) is one of the healthiest essential fatty acids available on the market and can increase the bioavailability of the cannabinoids and terpenes present in a product. It's colourless and tasteless which means it won't affect the taste of your e-liquid. Particularly important when terpenes are present, allowing you to appreciate all the subtle nuances of the flavours and aromas.

Do not exceed 200mg daily

Not to be used by or sold to anyone under the age of 18
