

# Fiddlers Elbow Grease

## RUBBING ALCOHOL / 70% IPA - Propanol - 100ml

Technical grade

A clear solution containing 70% isopropyl alcohol. It is an excellent disinfectant for all hard surfaces. It has so many uses - here are just a few

- A Disinfectant for surfaces, utensils, and equipment.
- Skin cleaner, Antiseptic and antibacterial agent.
- Hand & Surface sanitiser.
- Deicer - removes frost from windscreens and frees up frozen locks.
- Great glass and mirror cleaner when mixed with about 5-10 parts of water (especially when used with some newspaper to wipe off).
- Can remove hair spray from mirrors and tiles.
- Removes many ink and permanent marker stains ( but not all ).
- Great for cleaning and disinfecting phones, computers, and office equipment. It should NOT be sprayed directly onto equipment. Apply to a lint-free cloth and use it to wipe surfaces.
- Cleans Dry wipe boards to remove the residue/shadow.
- Removes the glue/sticky residues left on surfaces after removing labels, price tags, and stickers.
- Emergency Ice packs - when mixed with 2 parts of water and sealed in a bag solution can be kept in a freezer and is ready for use.
- Metal cleaner - removes fingerprints, water spots and light soiling from chrome, stainless steel, brass, etc. Cleans and shines.
- Room spray - mix a few drops of fragrance oils and mix thoroughly in a spray bottle.
- Odour eliminator for shoes and footwear. Spray Rubbing alcohol into shoes and allow them to dry before putting on.

Rubbing alcohol is flammable and should be handled with care. Always read the label for safety information before using.
