Orders over £60 are eligible for free delivery

1ml sample sizes are available [here](#) for those that would like try before committing to a larger size.

CannabinOil Hybrid CBD products are THC-free
They include an array of cannabinoids, terpenes and flavonoids from the natural plant to intensify the entourage effect.

We use MCT as the carrier in our Hybrid products. Already popular within the health and fitness community, MCT boasts many health benefits of its own and has superior bioavailability compared to other carrier oils. This enables more of the cannabinoids to be absorbed in your system.

When you combine CBD and MCT, two titans of the wellness industry, you get a super-charged boost of goodness.
