

Fiddlers Elbow Grease

Organic Hemp Tea - Loose 1kg

Just add a teaspoon of this marvellous loose organic hemp tea to a cup of boiling water (or half fill a tea strainer) and steep for 4 to 5 minutes.

Maybe add a slice of lemon and sweeten if you wish?
It can be cooled and served as an iced tea or added to cordials or smoothies.
A refreshingly versatile tea!

Hemp tea is made simply by drying the leaves of Felina and Futura strains of hemp plants. Cannabinoid and terpene extracts from the plant and bind to lipids during any heating process. For the best and full properties, the tea should be steeped for several minutes with some type of fat like milk, cream, or coconut oil. Without fat included in brewing, users will only get the benefits of antioxidants, fatty acids and the tea's sweet, subtle flavour rather than active cannabinoids

Our tea is grown organically in Lithuania.
