

Butternut HF-5B Compact Butterfly 2 element Beam

£699.95

DESCRIPTION

Antenna, Beam, HF, Butterfly Type, 5-band, 2 Elements, 1,200 W, 20, 17, 15, 12, 10 meters Brand: Butternut Manufacturer's Part Number: HF5B Part Type: HF Yagi, HEXX Beam, and Rotatable Antennas Product Line: Butternut 5-Band Butterfly Beam Antennas DXE Part Number: BUT-HF5BHF Beam Antenna Type: Yagi HF Beam Antenna Band Coverage: 20, 17, 15, 12, 10 meters HF Beam Antenna Elements: 2 HF Beam Element Material: Aluminum tubing Antenna Power Rating: 1,200 W Beam Antenna Boom Length: 6.00 ft. HF Beam Antenna Boom Diameter (in.): 1.125 in. HF Beam Antenna Longest Element: 12.50 ft. Beam Antenna Turning Radius: 6.90 ft. Effective Moment (approximate): 138 ft. lbs. Mast Mounting Clamp Minimum: 1.500 in. Mast Mounting Clamp Maximum: 1.500 in. Wind Surface Area: 3.000 sq. ft. Feedpoint Impedance: 50 ohm Antenna Feedline Connection Type: UHF female, SO-239 Antenna Weight: 20.00 lbs. Quantity: Sold individually. Notes: Manufacturer power rating is 1,200 watts PEP DC input to the amplifier final. Call for additional information. 1.5 in. OD mast recommended. Butternut 5-band butterfly beam antennas feature five popular HF bands--20, 17, 15, 12, and 10 meters--in a rotatable, trapless, 2-element beam. Butternut's 5-band beams are specially designed for the amateur with limited space and offer significant improvements over omnidirectional antennas, with useful forward gain and good front-to-side and front-to-back rejection of QRM. They accept masts with up to 1 1/2 in. diameters and are light enough to be turned with a TV rotator.
