

MFJ-1714 LongRanger Telescopic BNC/SMA 2 Meter Handheld Antenna

£22.96

DESCRIPTION

The MFJ-1714 Long Ranger Telescopic End fed Half wave 2 Metre HT Antenna. The Long Ranger 2 Metre 1/2 wave. For long-range, this MFJ end-fed 1/2 wave is hard to beat. Outperforms a 5/8 wave on an HT because the 5/8 wave needs a ground plane. It's shorter, lighter, has more gain, and places less stress on your antenna connector. When collapsed it performs like a rubber duck (0 1/2"). 40 in. extended.
