Our **Simple Jigsaw Puzzle 13 Piece - Sheep Dog** is more than just a jigsaw puzzle, it's an effective way of engaging people in conversation and stimulating the mind.

- Large piece puzzles; easier for people with limited dexterity
- Plastic design; extremely durable and meets infection control compliance
- Stimulates conversation and can be enjoyed in a group setting

Our 13 Piece Puzzles have been one of our best-selling dementia puzzles for many years, a simple twist on the classic jigsaw.

Bring this beautiful sheepdog to life

This puzzle is one of the our-best sellers, and here are a few reasons why: Australian Shepherd Dogs' tranquil manner makes them a popular household pet and a happy member of any family, the friendly smile that is seen when the puzzle has been created is sure to make anyone happy.

How It Works

The beautiful image of the Sheepdog on this puzzle has been carefully chosen to stimulate memories and conversation once the puzzle has been completed.

With thirteen pieces, this puzzle is the easiest in our range and suitable for people in the mid to late point of their dementia journey.

Photography

- High-quality images and contrasting colours help people with vision impairment
- Researched and tested generic images that will convey meaning to all individuals, regardless of gender, age, or social background
- Beautiful and well-photographed images

Potential Benefits on the Brain

Studies have shown that stimulating the brain with puzzles, activities, or games, may help reduce symptoms in dementia patients.

Dementia jigsaw puzzles may also increase motor neuron activity, and regular solving of puzzles or playing games could even help with daily tasks such as getting dressed.

However, we must stress that there is currently no conclusive and empirical evidence on long-term benefits to the brain of puzzles and games for people with dementia and more research is needed.
