The **Sounds of Nature CD** is an incredibly relaxing 30 minutes of audio that has proven to be very popular with people who have Alzheimer's & dementia.

A 'nature sounds CD' isn't only for people with dementia, we have many happy customers who have used the CD for a large variety of reasons;

- Anyone can use the CD to help them relax, meditate, or get to sleep
- May help calm someone who suffers from panic attacks or anxiety
- Avert a sensory meltdown in someone with autism

Our Sounds of Nature CD contains a variety of natural sounds; with birdsong, stags, foxes, buzzards, sheep & lambs, gentle soothing streams and ocean waves rolling up to the beach.

Alzheimer's & Dementia - What we like about this product

In the modern world, we are all bombarded by sounds of equipment & technology that isn't relaxing or pleasant on the ears, even for people with no memory impairment.

People with Alzheimer's & dementia find it harder to relax when surrounded by technology, especially when they may even forget what some of the noises are caused by.

However, we all have memories of nature sounds from our childhood, the older generations have more of these memories as they spent many more hours outdoors than recent generations; people with Alzheimer's & dementia will still recognise all of the animals & sounds in this CD, it may even be the first time they've heard them for years.

This CD brings familiarity & entertainment to people with Alzheimer's & dementia, whilst also promoting communication & discussion in groups.

**Running Time:** 30 minutes
