Price: £59.99 incl. VAT

Date: 15/06/2019

VAT Relief Eligible: Yes (£49.99 with VAT relief)

Delivery: £3.95 incl. VAT per order

The simple & innovative **The Day Clock** was designed by BIME (Bath Institute for Medical Engineering) for people with impaired memory.

The easy to read and informative design can remind someone of the current day - and period of the day - at a glance.

- **Plug & play straight from the box** - time is set by AlzProducts before dispatch
- **Completely automatic calendar** - only requiring manual input for changes in daylight saving
- **Back-lit display** - for night-time visibility
- **Battery back-up** - ensures time remains accurate if there is a power cut

Please note that the battery back-up cannot be used to power the clock, it simply retains the correct time. The clock must remain plugged into mains power for the day & period to be displayed.

Plug & Play - No Set-Up Required!

Simply plug your Digital Day Clock into your mains power upon arrival, & the correct time & date will be displayed.

- Local time & date programmed by AlzProducts before dispatch (to the second)
- Internal clock ensures that time remains accurate during transport

Day Period Times

Morning - 7am to 12 noon

Afternoon - 12 noon to 5pm

Evening - 5pm to 10pm

Night - 10pm to 7am

All day period times are now completely customizable, this allows users to program the clock for their individual needs. For example, some customers may want the clock to change from "Night" to "Morning" at 5am, or others at 8am.

Awards

- South West Innovation Award - Winner
- National Dementia Care Awards - Finalist
