**Delivery:** £3.95 incl. VAT per order

- Part of our MPPL System

The **Wireless Wander Motion Sensor Kit** is an alarm system that can alert you when it senses movement. The alarm comes in 2 parts:

- 1 x Motion Sensor(s) that is fixed to a wall with a provided screw, the motion sensor can also be used freestanding on a floor or desk
- 1 x Portable Pager Alarm - can be set to sound audio alarm or vibrate

When the motion sensors detect movement an electronic signal is sent to the remote receiver, sounding the alarm and alerting the carer that there has been movement in the specific area.

### Popular Usage

The Wireless Wander Motion Sensor has many uses, for example:

- In private homes during the daytime (or at night) to alert a carer that a person with Alzheimer's or dementia is trying to leave the home, can prevent both daytime & night-time wandering
- In care homes to alert a member of staff that a resident is trying to access a restricted area during the day, or has left the building during the night
- In shops & public buildings as a mobile chime to alert a member of staff that somebody has entered the building

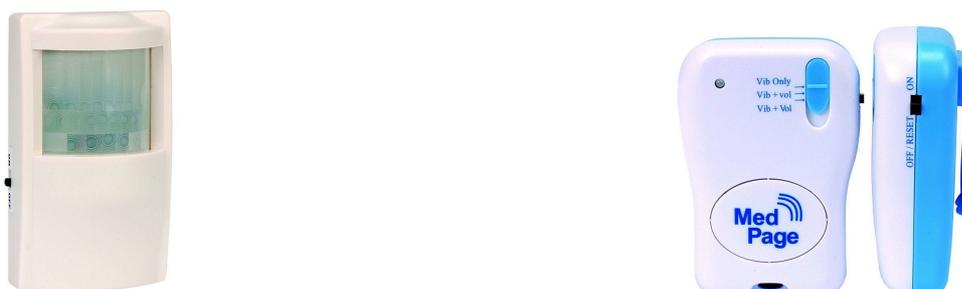

The receiver has 4 settings: Vibration + High Volume, Vibration + Low Volume, Vibration Only, and "Off" allowing the carer to be in complete control of when the alarm is activated.

The system includes all mounting materials and batteries.

### Features

- The motion sensor has a detection range of 7m at an 85° angle
