

Magiplug - Sink Overflow Plug

Code: MP1-KS

Price: £9.95 incl. VAT

Date: 04/07/2020

VAT Relief Eligible: No

Delivery: £3.95 incl. VAT per order

The **Magiplug** is a pressure activated sink overflow plug, a cheap yet effective method of preventing floods.

- Reliable pressure activated system
- Changes colour at 36° to help prevent scalding

How it works

1. When an unattended bath/sink/basin reaches a certain depth the Magiplug pressure plate opens and releases the excess water safely down the plughole, preventing a flood
2. This level is then maintained until the taps are turned off

The Magiplug is a must have product for anybody that is prone to forgetfulness; a cheap but effective alternative to costly flood damage repairs.

Requirements

Bath - Minimum 15" deep

Kitchen Sinks - Minimum 6.5" deep

Bathroom Basins - Minimum 5" deep

Any bath/sink/basin measuring **more** than the depths above will be suitable for use with the Magiplug. Once the water level reaches the "minimum level" the Magiplug will activate and will continue draining the water maintaining the minimum levels above.

Sink-Hole Diameter; The Magiplug fits the large majority of plugs in the UK, but will not fit extra large plugs with a diameter of 50mm or more.
