Bed Sensor Mat - WiFi Enabled with Smart App

Code: 100546

Price: £119.99 incl. VAT

Date: 06/08/2020

VAT Relief Eligible: No

Delivery: £3.95 incl. VAT per order

Our **Bed Sensor Mat with WiFi** is an alarm system that will alert you via a free smartphone app when someone leaves their bed.

- Part of our WiFi alarm system
- Controlled remotely via a free app
- Shows time-date stamped activity logs, which can be useful to view daily living habits
- Set monitoring times for sensors in app (i.e only sound alarm notification when door is opened between 11pm - 6am)
- Multiple sensors can be used and easily added or removed from an existing set-up (up to 200)

How does it work?

- Install bed sensor and connect to WiFi (instructions included)
- Install free APP on your smartphone
- Set times when the bed sensor is active and choose the type of alerts/alarms
- When activated, the WiFi operated bed sensor will send an alarm signal to your smartphone
- View activity logs, control alarm times, and much more, all remotely using the app

Customisable Alarms

Three types of alarms/notifications are available for all app users;

1. Alarm sound + notification
2. Notification + default notification sound (phone's default sound)
3. Silent notification

The app also has other key features regarding alarms and notifications;

- Precise details included with every alarm notification, giving details of alarm time, date, and location (if multiple sensors are used)
- Take photographs of your doors and link them to your alarms in the app (so when an alarm is triggered you can see which door)
- Create floor plans in the app for more complicated multi-sensor set-ups

Multiple Users

- One master user must be created, this user has control over when alarms/notifications are triggered
- Master user can then grant access for other users to receive notifications/alarms
- Each user can easily change the notification type for each alarm (see example below)

Notification/alarm created by master user = If door is opened between 11pm and 6am

Notification for User A (master): Silent
Notification for User B: Loud alarm

Other Features

- Loss of signal warning via Wi-Fi switch

- Low battery and sensor warning alerts in the app

App compatibility: iOS & android
Wifi connectivity: 802.11a,b,g,n,ac, 2.4 + 5 GHz
Wifi security: WEP, WPA, WPA2, 802.1x
