These prices are subject to change and are accurate at the time of writing, please see the SIM card manufacturer's price page for the latest information.

### Emergency Call to Action

- Emergency Call To Action - In the event of an emergency, the wearer can hold down the SOS button
- The watch will begin calling pre-set contacts and also update the location

### Phone Calls

- Caregivers can call the wearer of the WATCHU Guardian from the App (available on Apple & Google app stores)
- WATCHU Guardian wearers can call up to 16 contacts from the watch
- The WatchU **cannot** be set to automatically answer all phone calls from certain numbers (a feature included in some of our other GPS products)

### Geo Zones

- Geo-Zones are a virtual radius around a location, like your home or the park

- Receive alerts every time the wearer enters or leaves a Geo-Zone
- Geozone can be from a minimum of 500 metres up to 2000 metres
- Geozone features makes use of both WiFi and mobile data

## Free WATCHU Guardian App

The WATCHU Guardian App is available in the Apple App Store or Google Play Store.

- Free APP download and no subscription charges or fees
- Track the wearer's location
- Manage geo-zones
- Call the wearer
- Add contacts
- Send voice messages
- If required, the app can be installed on multiple phones to track the Watch user

Customers can also view and download the app to test compatibility of it with their devices at the following page; <https://www.watchu.com/pages/watchu-app-download>

## Water & Dust Resistant

- The WATCHU has an IP rating of 54
- Protection from limited dust ingress
- Protection from water spray from any direction
- Not advised to wear the WATCHU while washing hands, showering or anywhere there would be a risk of submerging it in water
- WATCHU is designed to withstand a child's rough & tumble play, however it has not been tested to ISO1413 standards

## Battery

- Li-Po 380mAh battery
- Up to 140 hours of battery life (depending on usage and GPS tracking)
- Up to 2 hours talk-time
- Charged using USB cable provided (also requires a computer/laptop or compatible mains power adapter)

## SOS Button

- Store up to 16 emergency contact numbers
- Once pressed the SOS button will cycle through all programmed contacts until it is answered

## Location Tracking

The WATCHU uses three different forms of tracking technology which it relays from the watch to the App user via the cellular network. GPS, WiFi & LBS.

Please note only one of these is used at any one time depending on the location of the watch and whether it is being used in an indoor or outdoor environment.

**GPS** - GPS is the most accurate form of location. Please note that GPS only works outdoors. The WATCHU requires a direct line of sight connection to a minimum of three Geo Positioning Satellites to communicate its location.

**WiFi** - When the WATCHU watch is unable to provide tracking location via GPS it will attempt to provide location tracking via WiFi to relay its position. This information will be relayed to the watch user via the cellular network.

**LBS (2G)** - Location Based Services works indoor and outdoor, it's known as LBS and uses a (Cell Tower/Mobile Phone Mast) to relay information.

When the WATCHU is unable to provide a location via GPS or WiFi it will use LBS. LBS shows the location of the (Cell Tower/Mobile Phone Mast) that the WATCHU is currently connected to.

Please note this can be quite some distance from the physical location of the WATCHU at that point in time.

The App provides location tracking information based primarily on GPS data and allows you to evaluate historical

tracking data for an accurate perspective of where the watch has been.
