

Micro GPS Locator Tracker

Code: 1005204

Price: £99.95 incl. VAT

Date: 26/05/2020

VAT Relief Eligible: No

Delivery: £3.95 incl. VAT per order

The **Micro GPS Locator Tracker with Fall Sensor** is tiny compared to most GPS location trackers and had a large range of useful features.

- GPS location is accurate to within 15m and will also provide location details from within a building
- The compact stylish design will appeal to all ages, especially with the fabulous colour choices available
- The Smartphone APP allows all settings to be maintained remotely
- No subscription, monitoring or web tracking fees
- Compact and light; 38mm x 38mm x 12mm and weighing only 24g (including battery)

Wrist Straps

All Micro GPS trackers are supplied with a wrist strap, as follows;

- White wrist strap with blue/pink locators
- Black wrist strap with black locator

For more information on the wrist straps please view the [Wrist Strap for Micro GPS Tracker](#) product page.

SmartPhone App

Control many settings and functions of the GPS sensor remotely using an app on your smartphone.

- Compatible with iOS (Apple) and Android
- Switch the fall sensor on/off, manage emergency contacts, set geo-fencing, and location interval updates
- View precise location of the tracker with integrated Google Maps
- Set remote alarm reminders
- Journey history review
- Monitor battery level
- Low SIM credit warning

Suitability & Uses

The Micro GPS Locator Tracker with Fall Sensor is suitable for a whole range of individuals and situations;

- Walking (wandering) and fall detection with GPS location for people with dementia or Alzheimer's
- People with special needs
- Lone worker protection
- Protection for Children, at school, on school trips or when playing outside
- Asset tracking for luggage, golf clubs, cycles, mobility scooters etc

GPS Location

GPS is the most accurate form of locating someone when outdoors and is very reliable.

- GPS location accurate to 15 Metres
- Indoor location tracking via Wi-Fi detection
- Link to home WiFi for leaving home alert (optional, not needed for other locator functions)

Geo-Fencing

- Geo-Fencing involves creating virtual areas on a map for monitoring purposes, like your home or the park
- Remote setup of Geo-fence via APP (no need to enter coordinates)
- Wander detection alarm when leaving the home

Fall Detection

- Fall detection sensors
- Fall activation warning with cancel button to prevent false alarms

Emergency SOS

- SOS contact button – sends location text to emergency contact list and/or voice call
- Store up to 5 emergency contact numbers

Call the GPS Locator

- Two-way voice call to GPS locator can be initiated by calling the SIM card number (just like a normal phone)
- Call can be answered by holding the button on GPS locator
- Auto-Answer setting allows you to set the locator so that it will always answer incoming calls
- Worried about who can call the locator? Activate Anti-Harassment mode and only the 5 numbers that are listed in SOS mode (see above) can call the locator

Battery & SIM Card

- Up to 72-hour battery standby
- Requires Micro SIM card (not included)
- Tested on all major mobile networks ("Three" network is not recommended)

Other Features

- Two-way mobile voice calling
- Caller "White List" to prevent annoyance calls or to limit who can contact the device
- Talking clock function – press button for speaking clock
- Attach to keys, wear with lanyard (included) or slip in a bag/pocket

GPS Locators & Pacemakers

Please be aware that if you;

- Intend to use a GPS locator with a lanyard worn around the neck AND
- The person who will be wearing the GPS locator has a pacemaker

There could be interference between the GPS locator and the pacemaker. Many GPS locators are now designed so they interfere with devices such as pacemakers as little as possible and there should be no issues, however we strongly recommend speaking to your GP or doctor for qualified medical advice.

Example Running Costs

As mobile data must be used by the device to transmit information, there will be ongoing costs incurred when using any GPS locator product.

Under test conditions and using a 'Pay as you go' SIM card, the Micro GPS locator used £10 worth of credit over a 6 week period. Over the 6 week period the following tests/requests were done;

- Tracking every minute over the six week period
- Tested the FALL alarm at least 10 times
- Pressing the SOS button at least 15 times
- Dialed 10 calls lasting 2 to 3 minutes each
- Received 5 calls lasting 2 to 3 minutes each

Please note: the price and examples above are for information purposes as the price paid will depend on a number of factors and could vary.

Water & Dust Resistant

- Splash proof to IP57
- Not recommended for use in the shower
