The **Minitell Alarmed Daily Pillbox Reminder** is a pocket sized pillbox that is both lightweight and portable.

- Can be set to alarm, vibrate, or both
- 5 compartments for medication
- Alarms can be set up to 5 times a day, or once a day for 5 days
- Lightweight and portable, can be carried in a pocket or handbag
- ISO 9001:2000 and Medical CE (Europe) certified, and RoHS compliant

### How to use the Pivotell Minitell

- The alarms are programmed using the LCD screen on the front of the pillbox
- At the preprogrammed time the pillbox will alarm/vibrate to alert the user
- The user then rotates the pillbox to access the pills from the compartment in the back
- The alarm is cancelled by the action of rotating the pillbox to access the pill compartment

### What happens if an alarm is missed?

Alarms will sound for 30 seconds. If the pill compartment cover is not rotated and no button is pressed (see snooze function below) within 30 seconds then the alarm will stop.

The alarm will then repeat a maximum of two more times for 30 seconds, at 5 minute intervals. If the pillbox has still not been rotated then the alarm time remains on the LCD screen the colon ‘:‘ flashes indicating that the pills have not yet been taken.

### Snooze Function

If any button is pressed during the 30 second alarm sounds, the alarm will silence. After 5 minutes the alarm will sound again. To stop the alarm instead of snoozing it the cover must be rotated and the pills removed.

### Other features

- Locking switch to prevent accidental alteration of settings
- 24 hour clock
- Backlit LCD display
- Each compartment has a capacity of 10ml
