Price: £30.00 incl. VAT

Date: 26/08/2019

VAT Relief Eligible: Yes (£25.00 with VAT relief)

Delivery: £3.95 incl. VAT per order

The **Pivotell Vibratime Watch** is a silent, vibrating wristband style watch which is a convenient and discrete reminder to help adults and children remember to do something during the day or night.

- The alarms can remind the wearer that it is time to take their medication, particularly useful with time-sensitive medication
- Can also be used to remind the wearer to wake up on time or that they need to get up and move about, to prevent sitting for too long
- The reminders help with daily living, such as knowing to go to the toilet in time, or that the user needs to drink or eat

How it works

- The Vibratime has up to 8 vibrating alarms which can be set per day
- At the pre-programmed times, the watch will vibrate and the time will be displayed on the watch
- Alarm 1 will vibrate for 40 seconds - useful as a wake-up alarm
- Alarms 2-8 will vibrate for 20 seconds
- All alarm vibrations can be stopped by pressing either button during the alarm
- Vibrations are quite strong and easy to detect
- To check the time press the right button once. The time will appear on the screen
- To check the battery level press the right button twice. The battery level percentage will appear

Key features

- Buckle fastening
- Silicone strap
- Supplied in black with additional watch straps available in pink, red, grey, blue, and purple
- The settings can easily be adjusted using the 2 buttons
- Not waterproof (splash-proof)
- CE-certified

Charging

- The Vibratime has a rechargeable battery, which can be charged easily through a USB connection
- The USB connector is included with the product
- The watch will be recharged within 2 hours and will then last for several days
- The battery will drain faster if the vibrating alarm is used intensively or the LED display is used frequently
